Graphical Budget Planner 1.9.0

Welcome !

Plan your future cash balance, simply.

It looks like this is the first time GBP starts on this computer (no settings were found). Here is how to get going. **We hope you will enjoy GBP !**

Start here

1. Look at an example

Scenario → Open example loads a complete sample budget. Explore it freely : your own files are not touched.

2. Follow the Quick Tutorial

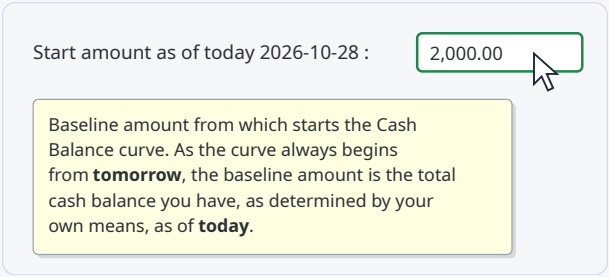
Help → Quick tutorial : in about 15 minutes, from an empty window to your first cash balance forecast.

3. Create your own scenario

Scenario → New..., then follow the 6 steps of the Quick Tutorial. Remember to save : **Scenario → Save**.

Getting help

Hover over any button or field : a tooltip explains it. Tooltips can be turned off in **Tools → Options...** (**Show tooltips**).



The Help menu gives you :

Quick tutorial — The essentials, with diagrams and a worked example.
User manual — Every window and every option, in full detail.
Change log — What is new in each version of GBP.

Free and open source — GBP is free and open-source software. Source code and new versions : **https://github.com/redmoon1945/gbp**
Send feedback — Questions, ideas or problems : open an issue on GitHub (**https://github.com/redmoon1945/gbp/issues**), or write to **redmoon1945@protonmail.com**.
